Respectfully Submitted,

W 
 Victoria L. Greer, PhD
 Superintendent of Schools

SUPPLEMENTAL INFORMATION: Brightly Software

Purpose: Facilities Department software annual subscriptions for work order system (Maintenance Direct) and space scheduling system (Event Manager)

Amount of Contract: \$29,784.16

Description/Scope of Services:

This contract is for software programs to manage and maintain the CPS Facilities Department work flow and space scheduling system.

Maintenance Direct \$11,043.95

This program is used for recording and assigning repair and other work that needs to be done by building and location. Senior custodians enter requests, which are then assigned digitally to trades staff and tracked to completion by the Trades Manager.

Event Manager \$18,740.21

This program is used to manage the flow of requests for the use of school space outside of regular school hours. It has two main components: internal users, which encompasses all CPS employees; and community users, which allows individuals and organizations in the community to request the use of space for various purposes. Event Manager provided a digital approval system individualized for the leadership of each building, and allows the Facilities Management Department to track all events, assign overtime custodial, security, theater and food services coverage for events as needed, invoice community users for the use of the space, and track collections of payments for such use. The annual cost of this system is paid out of the Facilities Management Revolving Fund, where the proceeds from school rentals are deposited.
